Git · Docker · Vite · GA4 · GTM · SSG/ISR · CI/CD · Agile

EDUCATION

BSc (Hons) Information Technology

Computer Networking & Security
Sunway University, Selangor
2018 – 2021

PROFILE

Frontend developer with 5+ years building responsive, accessible web applications across automotive, banking, consulting, and digital entertainment. Currently at Pixent owning frontend delivery for a customer-facing gaming platform, with a track record shipping enterprise products at Deloitte for Maybank. Comfortable owning the full frontend lifecycle from POC to production — and the workflow around it: analytics, performance, and CI.

EXPERIENCE

Frontend Developer

Dec 2025 – Present

Pixent Technologies · Kuala Lumpur

- Own frontend delivery for a customer-facing gaming platform; shipped mini-player and picture-in-picture playback that keep sessions alive while browsing.
- Built the KYC verification module end to end, gating promotions, deposits, and withdrawals behind verified identity.
- Delivered the affiliate dashboard and operate the CMS behind live promotions.
- Instrumented GA4 via GTM across the player funnel and applied SSG/ISR; set up a shared component layer and pre-commit/CI gates.

Senior Technology Analyst

Apr 2024 – Nov 2025

Deloitte Consulting SEA · Maybank M2E

- Developed a secure enterprise banking web app (React, Tailwind, Zustand) for products such as Deposits and Loans.
- Integrated RESTful APIs for real-time banking data and built multi-step terms-and-conditions flows.
- Created reusable components, ensured cross-browser compatibility, and partnered with QA to resolve issues.
- Fixed 7 tickets in 2 days on the E-Onboarding codebase without prior context.

Frontend Developer

Nov 2022 – Mar 2024

Edag Holding · Shah Alam

- Built two web apps (React & Angular) from POC to production and refined requirements with stakeholders.
- Resolved 82 merge conflicts across 7 branches and wrote Jest unit tests with 80% coverage.
- Integrated REST APIs and shared frontend and code-quality practices across MY and DE teams.

Frontend Developer

Sep 2021 – Oct 2022

OmniGeo Solutions · Kepong

- Built web apps and admin systems with Next.js and Bootstrap, responsive across devices.
- Created custom CSV upload, processing, and error-handling; implemented OAuth via NextAuth.
- Integrated RESTful APIs to ensure data integrity and seamless data visualisation.
